

Light strings

# Jelitto Star

## ILLUMINATIONEN

Our LED fairy lights have a length of 20 meters with 200 LEDs and are suitable for lighting trees, buildings and their contours, Objects and motives. In the dark season, they can also facilitate orientation and visually beautify along a courtyard entrance.

**20 m  
mit 200 LED'S**

Example contour lighting:

The string of lights along the gutter emphasizes the contours of the building and underlines the beautiful design. The star is a special one Highlight, which is visible from all sides and already from a distance the way to the house or the adjoining Christmas market shows.

Example tree lighting:

The trees parallel to the roadway make one beautiful avenue. The chains became partial spiral, or from top to bottom appropriate. The main focus here was the round Forming the shape of the branches. Due to the regular lighting of the Trees gives a nice overall picture, which runs through the entire street.
